

## Gewebe-Imprägnierung (Fabric Impregnator)

### DESCRIPTION

Fabric Impregnator has been developed for impregnating and re-impregnating textiles, especially convertible soft tops. Special components stop the absorption of liquids, thus preventing the formation of spots and patches. The fabric repels liquids so that they can be easily dabbed or wiped off. If necessary, wipe off using clean water.

### PROPERTIES

- protects fabrics from the penetration of water
- prevents the formation of spots and patches
- repels liquids
- impregnates

### TECHNICAL DATA

Basis	: ketones/preserving agents
Colour	: colourless
Density at 20 °C	: 0.73 g/cm <sup>3</sup> (density bottle)
pH-value	: n.a
Viscosity	: liquid

### APPLICATION

For impregnating and re-impregnating convertible soft tops, tents and woollen and synthetic materials, textile covers etc.

### INSTRUCTIONS

Before treatment, check the surface to make sure that it is clean and dry. If not, clean it and dry it. Spray Fabric Impregnator thinly and uniformly onto the surface at a distance of approx. 20cm. Use only in a well ventilated area. Ventilate the area while the product is drying (from 1 to 3 hours).

### AVAILABLE PACK SIZE

Fabric Impregnator	400 ml	Part no. 1594
