

Electronic Spray

DESCRIPTION

Electronic Spray is a fully synthetic contact spray which is compatible with plastics and formulated for use on vehicle electronic and electrical systems. Electronic Spray contains no silicones or mineral, animal or vegetable based oils.

PROPERTIES

- cleans contaminated contacts
- protects against corrosion
- displaces moisture and water
- penetrates layers of oxides and sulphides
- reduces contact resistance
- does not contain silicones

TECHNICAL DATA

Basis	: synthetic oil/additives
Density at 20 °C	: 0.89 g/cm ³
Flash point	: 40 °C
Pour point	: -52 °C (synthetic oil)
Spec. electr. resistance	: 1.59 • 10 ⁷ Ohm • cm (synthetic oil)
Propellant	: propane/butane Spraying in air may lead to the formation of explosive mixtures.
Regulation on Flammable Liquids Class (Germany)	: A II

APPLICATION

Used for the care and maintenance (cleaning and protection) of all electrical components on the motor vehicle such as plug and terminal connections, lamp sockets, cable distribution boxes, switch elements, relays, ignition distributors, contact breakers, starters, dynamos/alternators, fuses, battery terminals and antennae and for the lubrication of fine mechanical components.

INSTRUCTIONS

Spray components with Electronic Spray before installing them. If the contacts are heavily corroded, allow the product to act for longer and rub off corrosion residues with a cloth or brush.

Note: After spraying on, allow a flash-off period of 10 min. before connecting the component to a power supply.

AVAILABLE PACK SIZE

Electronic Spray	200 ml	Part No. 3110 D-GB-I-E-P
