

Fuel Protect

DESCRIPTION

Fuel Protect is an ash-free, self-mixing combination of active agents, formulated according to the latest additive, fuel and engine technologies and specially developed to fulfill the demands of today's engines, fuels and running conditions.

PROPERTIES

- Removes and binds water from the fuel system and the tank
- Protects against corrosion throughout the fuel system
- Environmentally friendly and economical
- Prevents carburetor icing
- Proven performance with catalytic converters and turbochargers

TECHNICAL DATA

Base : additives/special carrier fluid
Color : pale, colorless
Density at 15 °C : 0.794 g/ml
Combustion class number at 20 °C : 1.382

APPLICATIONS

For all gasoline engines (carburetor and fuel-injection engines). For rectifying difficulties with starting, irregular idling, poor throttle response, performance losses. Prevents the problem of corrosion in the gasoline system and thus prevents operational malfunctions.

APPLICATION

Add to fuel whenever filling up. One 300 ml can of Fuel Protect is sufficient for 60 liters of fuel.

AVAILABLE PACK SIZES

Fuel Protect	300 ml	Part no.	2530
