

Schleif- und Polierpaste (Grinding and Polishing Paste)

DESCRIPTION

Grinding and Polishing Paste has been specially developed for the easy removal of weathered and dull layers of paint, rough contamination, paint spray dust, scratches and surface cracks. Areas treated with Grinding and Polishing Paste can be painted over again without any further treatment.

PROPERTIES

- easy removal of weathered and dull paint layers
- optimum preparation for painting
- simple to use

TECHNICAL DATA

Basis	: grinding agent/solvents
Colour	: reddish brown
Form	: paste-like
Density	: 1.27 g/cm ³
pH-value	: n.a.
Solubility	: partially soluble in water
Flash point	: > 70 °C

APPLICATION

Used especially for preparing surfaces for painting and for removing paint damage such as scratches and paint spray dust.

INSTRUCTIONS

Clean surfaces to be treated. Rub Grinding and Polishing Paste into small areas using a cloth or sponge and exerting pressure until the oxidised layers, dirt or scratches have been removed. Carry out subsequent paint care by polishing and preserving.
