

## Klima Fresh

### DESCRIPTION

Within a short time (approx. 10 minutes) removes the unpleasant odors that are caused by bacteria and mold in air conditioning systems, ventilation ducts or vehicle interiors. Simple use without removal of the pollen or dust filter. A pleasant, fresh fragrance lingers behind. Works to prevent allergic reactions.

### PROPERTIES

- Removes musty smells
- Exterminates molds and bacteria
- Provides fresh, clean air
- Increases comfort when traveling

### TECHNICAL DATA

Base	:	Alcohol solution with fragrances	
Color	:	colorless	
Density at 20 °C	:	0.943	g/cm <sup>3</sup> DIN 51757
Solubility in water	:	soluble	

### AREA OF USE

For cleaning and disinfecting vehicle air conditioning systems and vehicle interiors.

### APPLICATION

Before applying the product the surface of the evaporator should be dried by using the vehicle heating system. For this, the engine must be started. Afterwards the air conditioning system must be switched off. Set the temperature switch to max. (warm) and the heating and ventilation system to legroom position. Let the system operate for 10 minutes at max. fan power and in recirculation mode. Shake the can well before use. Adjust air distributor switch to fresh air nozzle middle (passengers) and top (front window) Position it in the intake area of the air recirculation system (mostly front passenger legroom) by means of the covering box. Then, activate the spray head until it snaps into place. During spraying and exposure time (approx. 10 minutes) the windows and doors of the vehicle must be kept closed. After cleaning, the evaporator surface must be dried again for approx. 10 minutes and at the same heating and ventilation settings. Finally, shut off the engine and vent the passenger compartment of the vehicle for approx. 10 minutes by opening the doors.

### AVAILABLE PACK SIZES

Klima Fresh	150 ml	Part no. 4065 D-GB-I-E-P
	150 ml	Part no. 2389 D-NL-F-GR-ARAB
