

Metallic-Hochglanz (Metallic High Gloss Polish)

DESCRIPTION Due to its special composition, Metallic High Gloss Polish evens out light scratches and freshens up the paint surface in a single process and the high gloss is easily restored to mildly weathered and matt paintwork. Metallic High Gloss Polish repels rain and dirt over long periods and increases the paint's resistance to damaging environments.

PROPERTIES

- radiant high gloss
- super-easy to polish
- suitable for machine polishing
- good long-term protection
- optimum protection against aggressive environments

TECHNICAL DATA

Basis	: silicones/micro-polishing pigments
Form	: viscous
Odour	: characteristic
Colour	: green
pH-value	: n.r.
Flash point	: 51 °C
Viscosity at 40 °C	: > 7 mm ² /s
Density at 15 °C	: 0.99 g/cm ³
Solubility in water	: emulsifiable

APPLICATION Specially developed for metallic paints from new to matt. The original gloss is easily restored to weathered and matt paintwork. Suitable for machine polishing.

INSTRUCTIONS First, thoroughly clean the surfaces to be polished and dry them carefully. Shake Metallic High Gloss Polish vigorously before use and pour onto a soft rag, polishing cloth or sponge. Apply thinly and evenly to the paint surface using light pressure and circular movements. Only treat one section at a time. Allow Metallic High Gloss Polish to dry until it forms a matt coat. Remove this and polish using a clean, dry cloth. Do not use under direct heat or on warm paint surfaces. Regular application gives the optimum results.
