

Kunststoff-Tiefen-Pfleger (Plastic Deep Treatment)

DESCRIPTION

Plastic Deep Treatment is a combination of agents which has been formulated to protect, treat and enhance the appearance of all plastic components in the motor vehicle. Plastic Deep Treatment gives the plastic surfaces a matt-silk deep sheen and it also repels dust, dirt and water. By repeated use, badly weathered plastic surfaces can be restored to a pleasing appearance.

PROPERTIES

- protects and treats all plastics in the vehicle interior and exterior
- produces a matt-silk deep sheen
- repels dust, dirt and water
- simple to use

TECHNICAL DATA

| | |
|---------------------|-----------------------------------|
| Basis | : treatment preparation/silicones |
| Colour | : white |
| Form | : liquid |
| Density at 20 °C | : 1.00 g/cm ³ |
| pH-value | : 7.8 |
| Solubility in water | : miscible |

APPLICATION

Specially developed to protect all plastic surfaces on the motor vehicle such as components in the vehicle interior and on the vehicle exterior, camper vans and equipment, boats, sports items and the household.

INSTRUCTIONS

First clean the parts to be treated. Shake Plastic Deep Treatment vigorously before use. Next, apply evenly to a soft cloth or sponge and lightly rub in to the surface. If necessary, rub again using a dry cloth. Repeat treatment if the surface is badly weathered. Regular application gives the optimum appearance.
